

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate report year generation study for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, (MS-25)
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

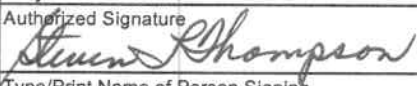

- ☐ 1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
- ☒ 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

Section I: Jurisdiction Information and Certification

All respondents must complete this section.

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name		County	
City of Buellton		Santa Barbara	
Authorized Signature 		Title	
Type/Print Name of Person Signing		City Manager	
Steven L. Thompson		Date	Phone () Include Area Code
		5-22-06	(805) 686-0137
Person Completing This Form (please print or type)		Title	
Eric C. Lohela		Waste Consultant	
Affiliation:	Consultant for the City of Buellton		
Mailing Address		City	State
City Hall • P.O. Box 1819		Buellton	CA
			ZIP Code
			93427
E-Mail Address		citymanager@cityofbuellton.com	

Section II: Information for New Generation-Based Study for Existing or New Base Year											
Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4"). Note: New base years must be representative of a jurisdiction's disposal and diversion.											
1. Current Board-approved existing base year: <div style="border: 1px solid black; padding: 2px; min-height: 30px;">1995</div>	2. Proposed new generation-based study year: <div style="border: 1px solid black; padding: 2px; min-height: 30px;">2004</div>										
3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion: <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>The previous Buellton base year was extrapolated from the Santa Barbara County Generation Study, using data from the early 90's. The 2004 year study accurately represents the City of Buellton's current waste and diversion streams by measuring new and improved City diversion programs, and the ten largest businesses in Buellton. Furthermore, it incorporates data from previously unaddressed streams such as rendering and securing paper shredding at local banks, increasing the accuracy of the study.</p> </div>											
4. Enter diversion rate information below.											
Diversion rate calculated using existing base year	a. 42 %	Diversion rate calculated using new generation-based study	b. 44%								
Existing base year pounds/person/day based on generation	14.76209775	New generation based study pounds/person/day based on generation	15.32								
Existing base year: <table style="width: 100%; border: none;"> <tr> <td style="text-align: right;">Residential generation</td> <td style="text-align: right;">49 %</td> <td style="text-align: right;">Non-Residential generation</td> <td style="text-align: right;">51 %</td> </tr> </table>		Residential generation	49 %	Non-Residential generation	51 %	New generation based study: <table style="width: 100%; border: none;"> <tr> <td style="text-align: right;">Residential generation</td> <td style="text-align: right;">28 %</td> <td style="text-align: right;">Non-Residential generation</td> <td style="text-align: right;">72 %</td> </tr> </table>		Residential generation	28 %	Non-Residential generation	72 %
Residential generation	49 %	Non-Residential generation	51 %								
Residential generation	28 %	Non-Residential generation	72 %								
Population existing generation-based study		Population new generation-based study									
<div style="border: 1px solid black; padding: 2px; min-height: 20px;">3,380</div>		<div style="border: 1px solid black; padding: 2px; min-height: 20px;">4,461</div>									
5. Please explain how the new diversion rate is consistent with your current diversion implementation efforts and also explain the specific reasons for the difference. <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>As stated above, the previous study used outdated data and extrapolation for its base year from the County of Santa Barbara's original Waste Generation Study. Since that time, Buellton has experienced significant growth in both business and residential sectors, changing the generation percentages proportionally. Since the authorization of the original SRRE, the City of Buellton's diversion efforts have evolved to meet the changing needs its constituency. New policy implementation, mandatory diversion, increased promotion, and augmented recycling are contributing factors to and are consistent with the present day diversion rates.</p> </div>											
6. If the proposed new generation tonnage results in an increase in your pounds per day, please explain how this is consistent with your current diversion implementation efforts and provide examples (e.g., change in jurisdiction's demographics). In addition, If your pounds per person is over the state average of 11.2 pounds, please explain why. <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>The City of Buellton's demographics have not changed significantly since the original base year study but the growth of the wine and hotel industries has greatly increased the amount of material disposed of in Buellton. With less than 4,000 residences and 72% of generation coming from the non-residential sector, the waste created by out of town guests staying in the nearly 800 hotel rooms and 5 winery crushing facilities has a significant impact on the pounds per day average. With a comprehensive residential recycling program in place, the City continues to work with local businesses to divert through composting (wineries) and recycling (hotels) as much material as possible.</p> </div>											

Section III - Disposal and Diversion Information			
1. Disposal Tonnage (enter values):	2098	4894	6992
	Residential	Non-Residential	Total
Please select the ONE choice below that best explains your disposal data and complete the required tables.			
<input checked="" type="checkbox"/> a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Number 2.) <input type="checkbox"/> b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.ciwmb.ca.gov/LGCentral/Forms/rytnmdrq.doc and submit with <input type="checkbox"/> c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmb.ca.gov/LGCentral/Forms/rytnmdrq.doc and submit with the new bas year			

2. In the table below, list the summarized diversion activities, tonnages, material types, actual or conversion factors, and diversion data records that support your claim and are available for Board verification. **Note: The Board expects the jurisdiction to be able to provide all back-up documentation, if requested.** Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition and percentage calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids [e.g., concrete, asphalt, dirt, white goods, and scrap metal,] you must identify those programs and waste types and complete Section VI. Survey forms for the top ten businesses must be included as an attachment with the generation study year and should be identified as Attachment IVa.

(Note: The Board has indicated that total source reduction amounts greater than five percent will be scrutinized. Please be prepared to substantiate the amounts.)

Note: Detailed Non-Residential waste audit information for the top ten businesses surveyed must be included in Section IV.

Section IV - Specific Non-Residential Sector Waste Audits

Top 10 Non-Residential Generators

Please complete this table for the top ten non-residential businesses that were surveyed. **Use the business type in lieu of the specific business name** (e.g., grocery store vs. Bestway Grocery Store) List each non-residential business separately from largest to smallest, based on total diversion tons. Audit reference number should be the same number used to identify businesses on the survey/audit sheets, and must be identical to the data in the Section V spreadsheet.

Audit Reference Numbe	Type of Non-Residential Generator	Include Material Type (e.g., paper, grasscycling). (List materials on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section III)	Survey Method Phone (P) Mail (M) On-site (O) Other ____
1	Winery	grape pomice composting			165	164.93	1.3%	
2	Winery	grape pomice composting			30	30	0.2%

Section VI - Restricted Waste

For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program or generator, please provide the following information:

Insert 1

1. If the diversion program started on or after January 1, 1990, complete the following table.

Note: Specific Program Name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept."). Please input the complete program name with business type if appropriate. If you need to add additional programs, insert a row by clicking on the button for that section.

Restricted Waste Type	Audit Reference Number	Specific Program Name	Year Started	Generation Study Diversion Tonnage

Pull Down for Waste Types ▼				
Pull Down for Waste Types ▼				
Pull Down for Waste Types ▼				

2. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board, on a separate sheet marked "Attachment Section VI. 2", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).

- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to individual programs (PRC sec 41781.2(c)(2). Please include documentation.

- The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an "Attachment Section VI.2" for that waste type and program.

Instead please provide date of Board approval of previously submitted information. _____ (Date)

If documentation is not available, go to Number 4.
